**THE CHALMERS CAR IS POPULAR WITH CANADIAN MILITIA**

Following up the original order for forty-one cars placed with the Chalmers Motor company of Canada, limited, at Walkersville, Canada, the department of militia and defense of Canada has registered a repeat order for twenty more 2,400 c. c. m. Chalmers for the use of army officials. This brings the total to sixty-one Chalmers cars now owned by the Canadian government.

Before selecting any cars for army service, government engineers experimented with various makes of cars on the Canadian market. Chalmers were torn down and every part was subjected to a grueling test. The 2,400 c. c. m. Chalmers was chosen at the end of these experiments because of workmanship.

The first order for forty-one cars was distributed among the different concentration camps from Halifax to Victoria, individual cars being placed at Halifax, Victoria, St. John, Quebec, Montreal, Valparaiso, Ottawa, Toronto, London, Seward, Winnipeg, Niagara-on-the-Lake, Camp Borden, Regina, Calgary, Vancouver, etc.

After six weeks in active service the officials were so well pleased with the performance of these Chalmers that a repeat order has been placed with the Chalmers Motor company of Canada, limited, for twenty more, present indications point to an early call for additional cars in substantial quantities.

The Chalmers Motor company of Canada, limited, is now in a position to make prompt deliveries and the large factory at Walkersville is working on full schedule.

**A SUCCESSFUL BANKER'S ADVICE**

(D. C. Forbes in Leslie's)

Both Chicago and the nation's bankers have honored James R. Forgan. He has been chairman of the Chicago clearing house committee since 1901, was elected not only a director of the federal reserve bank of Chicago, but also president of the federal advisory council, a special national tribute to fellow bankers to his outstanding ability. He is chairman of the Security fund, a director in various local enterprises and of the Equitable Life Assurance society.

His advice to young men—he has three sons of his own—is to equip themselves for higher and higher positions—and save money! Being Scotch, he imbued the spirit of thrift with his porridge and has shortly calculated:

"Extraordinary," he declares, "is America's national sin. Most young people make no effort to save; few even of older years save systematically. My method was to start the new year by fixing the sum I would save during the year. If I decided to buy a \$1,500 bond I would pay perhaps \$100 in cash, borrow the balance from the bank and repay \$75 every month. That \$75 was the first thing I paid on receiving my salary. The remainder had to last the whole month. December found me sole owner of the bond. I never speculated—I can't read the stock exchange tape intelligently even now."
